PROMASTIC XForce

HIGH ABRASIVE MASTIC SURFACE TOLERANT

PROMASTIC XFORCE is an epoxy mastic surface tolerant can be applied on any substrate with minimum surface preparation, early flash rusting, and water jetting surface. With special glassflake pigmented to give excellent abrasion resistance.

Features:

- Lower surface preparation (ST 2).
- High abrasion resistance.
- Excellent weather resistance.
- Good hardness up to 5H.
- Good surface tolerant.
- Ease to apply.
- Reduce maintenance cost.
- Suitable for new building, dry dock, and onboard maintenance.

PROMASTIC XFORCE is specially designed for all areas where ultimate abrasion is required. High abrasion combined with an excellent protection. Promastic XForce makes an optimum protection for your asset with maximum hardenability.

PROMASTIC XFORCE has excellent adhesion properties for a wide range of substrates, and give good benefits such as:

- Simplified product ranges → less inventory on sea store
- Recommended for new building, dry dock, and onboard maintenance
- Fast drying and ease application
- Ease to cleaning
- Surface tolerance → reducing downtime
- DFT up to 200 micron in a single coat
